2018 Visit of students from La Source University, Switzerland

Student life at the Japanese Red Cross College of Nursing
The three week course gave our two guests the opportunity to learn about and experience the Japanese healthcare system, while also engaging in peace studies, community activities and taking part in lectures and practical visits related to Maternity Nursing, Disaster Relief Nursing and the work of the Japanese Red Cross.

Interaction with students and local residents
They also did some sightseeing, and learned about Japanese culture, taking part in a series of cultural experiences with our students, including traditional brush calligraphy, the tea ceremony, cooking Japanese food and enjoying okonomiyaki.

The final days of the programme
We sincerely hope they took many great memories back to Switzerland and enjoyed their visit as much as we enjoyed hosting them.
